## IPHONE VS PSP-I

Iphone is the big deal with vodafone and airtel they must be launching the i phone on month of august Price-wise and capability-wise, the new iPhone 3G is comparable to Research In Motion's (RIMM) BlackBerry Curve, and Samsung's Instinct. However, maintenance costs make iPhone more expensive.

May be the price of iphone will be around to 12k-15k in india the cost of i phone is may be very expensive but with compare to psp ,iphone having a very great futures and good graphics in it but the problem is coming with cost .the cost of psp is around 8k and price of iphone is may be around 12-15k for 8gb may be psp is better to iphone for gaming and in future PSP will also upgraded with new software and technology

just tell us what will be comfortable for you i-phone or psp ?

1 main thing is i-phone having a all in 1 facility instead of psp is only for gaming

the price of psp -8k

the price of iphone -500\$

in india with network-i wil cost around 15K with yearly subcribstion
